

VISIBILITY. KNOWLEDGE. ACTION.

PowerBroker Identity Services: Open vs. Enterprise

June 2015

	PowerBroker Identity Services	
Features	Open	Enterprise
<p>Active Directory Authentication</p> <p>Allow users to use their Active Directory Credentials (Username & Password) to gain access using native Kerberos/LDAP protocols to non-windows such as Unix, Linux and Macs. PowerBroker Identity Services is fully site-aware performing authentication with the same reliability as any windows system.</p>	✓	✓
<p>Multiple Domain and Forest Support</p> <p>Users can authenticate and systems can be joined to multiple domains in the same or different forests. PowerBroker Identity Services supports all Windows trust types between Windows 2000 and higher domains - forests, external, 1-way, 2-way, SID filtered, transitive, non-transitive, and so on.</p>	✓	✓
<p>Single Sign-on</p> <p>Enable SSO from desktop to remote machines or between systems without the need to constantly re-enter credentials. By leveraging Kerberos, Active Directory's Authentication Protocol, Single-sign-on is easy regardless of platform.</p>	✓	✓
<p>Distributed File System (DFS) Support</p> <p>Location aware connectivity to Microsoft DFS namespace.</p>	✓	✓
<p>Samba Integration</p> <p>Easily connect to SAMBA shares without having to re-enter enter your credentials.</p>	✓	✓
<p>Command Line Interface</p> <p>Full system management from the command line.</p>	✓	✓
<p>Centralized Account Management</p> <p>By consolidating accounts into Active Directory you have a centralized username and password.</p>	✓	✓

<h3>Cached Credentials</h3> <p>Similar to a traditional Windows desktop if a user on Unix, Linux, or Mac cannot communicate with Active Directory PowerBroker Identity Services keeps a cached copy of the user's credentials to allow for offline access.</p>	✓	✓
<h3>Customized UID & GID Mapping</h3> <p>All UID's and GID's for users and groups respectively can be customized based on existing systems, policy or other needs.</p>	☒	✓
<h3>Group Policy for Unix & Linux</h3> <p>PowerBroker Identity Services extends the capabilities of the native group policy management tools to include specific group policy settings for Unix & Linux to attain a consistent configuration across the enterprise.</p>	☒	✓
<h3>Group Policy for Mac</h3> <p>Optional integration of Microsoft GPO with Apple Workgroup Manager to provide the most extensive options for managing settings on Macs in your enterprise.</p>	☒	✓
<h3>Snap-ins for ADUC and GPMC</h3> <p>All day-to-day management of users, groups, and policy configuration can be performed using native Microsoft management tools like Active Directory Users and Computers and Group Policy Management Console.</p>	☒	✓
<h3>RFC 2307 Compliant</h3> <p>Store Unix information in Active Directory's RFC 2307 attributes for users and groups.</p>	☒	✓
<h3>Flexible User Identification Model</h3> <p>The industry leading "Cells" model allows for flexible options to have different usernames, UIDs, GIDs and default shells for particular systems based on application or technical requirements.</p>	☒	✓
<h3>SNMP</h3> <p>Configure a wide array of success and failure SNMP traps via the command line and/or group policy.</p>	☒	✓

Two Factor Authentication Extensive support for smartcards and one-time passwords (OTP) systems providing a level of assurance when users access critical systems.	☒	✓
Operational Dashboard Easy access to system status and metrics from a management console.	☒	✓
Centralized Reporting Out of the box reports that will help with compliance and audit requirements, all accessible through a single interface.	☒	✓
Centralized Event Management All audited activity is securely aggregated to a central event database.	☒	✓
24/7 Phone based support	☒	✓

About BeyondTrust

BeyondTrust® is a global cyber security company that believes preventing data breaches requires the right visibility to enable control over internal and external risks.

We give you the visibility to confidently reduce risks and the control to take proactive, informed action against data breach threats. And because threats can come from anywhere, we built a [platform](#) that unifies the most effective technologies for addressing both internal and external risk: [Privileged Account Management](#) and [Vulnerability Management](#). Our solutions grow with your needs, making sure you maintain control no matter where your organization goes.

BeyondTrust's security solutions are trusted by over 4,000 customers worldwide, including over half of the Fortune 100. To learn more about BeyondTrust, please visit www.beyondtrust.com.
