

Retina CS Add-On: Configuration Compliance Module

AUTOMATED CONFIGURATION, AUDITING AND REPORTING

Combined with eEye's Retina CS Management Console solution, the **Configuration Compliance Add-On Module** simplifies how you audit and report on common industry configuration guidelines and best practices.

While many organizations focus on implementing strong controls over systems and applications, they often fail to formalize, automate, or optimize the business processes that keep their Windows environment secure. Ensuring that systems are configured according to policy is critical to reducing risk, improving security, and demonstrating compliance. However due to constantly changing networks and systems combined with time consuming monitoring and reporting, this is often a challenge. Organizations need to take corrective actions when changes or threats impact their security and compliance posture.

SIMPLIFIED CONFIGURATION COMPLIANCE

The eEye Configuration Compliance Add-On Module simplifies configuration compliance with drag-and-drop templates for Windows operating systems and applications from FDCC, NIST, STIGS, USGCB and Microsoft. Prioritize and manage risk, audit configurations against internal policy or external best practice and centralize reporting for monitoring and regulatory purposes.

COMPLETE CONFIGURATION ASSESSMENT

Provides a comprehensive view of Windows devices by retrieving software configuration that includes audit settings, security settings, user rights, logging configuration and hardware information including memory, processors, display adapters, storage devices, motherboard details, printers, services, and ports in use.

OUT-OF-THE-BOX CONFIGURATION AUDITING

Out-of-the-box configuration auditing, reporting, and alerting for common industry guidelines and best practices to keep your network running, available, and accessible.

BENEFITS

AUTOMATICALLY AUDIT CONFIGURATIONS against industry baselines and benchmarks

PRIORITIZE AND MANAGE RISKS by adhering to standard industry benchmarks or customize configuration baselines for your needs

KEEP UP-TO-DATE WITH INDUSTRY BENCHMARKS via eEye's benchmark library

OUT-OF-THE-BOX configuration monitoring, reporting & alerting

BUILT-IN VULNERABILITY REPORTING and integration with Retina Insight for delta dashboards and drilldowns

STREAMLINED REPORTING for government and corporate standards

eEye Digital Security®

CONFIGURATION AUDITING

Compare assets to industry baselines and best practices to check whether any software or hardware changes were made since the last scan that could impact your security and compliance objectives.

UP-TO-DATE BASELINES

With this module, a complete configuration compliance benchmark library keeps systems up-to-date with industry benchmarks including changes to benchmarks and adjustments for newer operating systems and applications.

CUSTOMIZED BEST PRACTICES

Customized best practices for improved policy enforcement and implementation for a broad set of industry templates and standards including built-in configuration templates for NIST, Microsoft, and more.

BUILT-IN TEMPLATES

Built-in templates for Windows operating systems and applications from FDCC, NIST, STIGS, USGCB, and Microsoft.

OVAL 5.6 SCAP-CERTIFIED

Retina is a OVAL 5.6 SCAP-certified scan engine and interpreter.

STREAMLINED REPORTING

Streamlined reporting for government and corporate standards with built-in vulnerability reporting and integration with Retina Insight for delta dashboards and drilldowns.

Description	Passed	Failed	Other
Anonymous Access to Named Pipes and Shares	1	0	0
Audit Access to Global System Objects	1	0	0
Audit Backup and Restore Privileges	1	0	0
Audit Policy Subcategory Settings	0	1	0
Checking of Hyper-credentials	0	1	0
Class Inheritance for Non-Windows	1	0	0
Classic Login	0	1	0
Computer Access (Planned) Root	1	0	0
Default Global Security Member Ownership	1	0	0
Default - Remote Reporting	1	0	0
Default-User-Subtype	0	1	0
Display of Last User Name	1	0	0

Benchmark Compliance Summary Sample Report

SYSTEM REQUIREMENTS

RETINA CS 2.0.X + AND RETINA INSIGHT 2.0.1 +

WINDOWS SERVER 2003 SP2 OR HIGHER (32-BIT), SERVER 2008 (32-BIT AND 64-BIT), OR SERVER 2008 R2 (64-BIT)

MICROSOFT SQL SERVER 2005 SP3 OR 2008 SP2 (STANDARD OR ENTERPRISE EDITIONS ONLY)

MICROSOFT SQL SERVER REPORTING SERVICES & ANALYSIS SERVICES

INTEL DUAL CORE 2.0GHZ (OR COMPATIBLE, MINIMUM)

4GB MINIMUM / 8GB RECOMMENDED (REQUIRES X64 OS)

500MB SOFTWARE INSTALL / 40GB DATABASE MINIMUM

NETWORK INTERFACE CARD (NIC) WITH TCP/IP ENABLED

MICROSOFT .NET FRAMEWORK 3.5 (INCLUDED WITH INSTALLER)

MICROSOFT IIS 6.0 OR HIGHER ASP.NET

ADOBE FLASH PLAYER 10.0 OR HIGHER

ORACLE SUN JAVA VERSION 6 UPDATE 21 OR HIGHER

MICROSOFT SILVERLIGHT 4.0 OR HIGHER

About eEye Digital Security

Since 1998, eEye Digital Security has made vulnerability management simpler, less expensive, and more effective by providing the only unified vulnerability and compliance management solution that integrates assessment, mitigation, and protection into a complete offering. Consistently the first to uncover critical vulnerabilities and prevent their exploit, eEye leverages its world-renowned research and development to strategically secure customer assets. Thousands of mid-to-large size organizations, including some of the most complex IT environments in the world, rely on eEye solutions to protect against the latest known, unknown, and zero-day vulnerabilities.
