

CENTRALIZED SECURITY MANAGEMENT

Retina CS provides a single view into all security risk information within the IT environment – across all locations and assets. It allows you to dramatically simplify the management of your distributed infrastructure, no matter how complex, while ensuring true end-to-end protection.

ENTERPRISE & EXECUTIVE REPORTING

Retina CS provides enterprise-wide security reporting in easy-to-read layouts that include visual charts and graphs for quick assessment, mitigation, and protection. Choose from out-of-the-box or customizable reports for insight into any aspect of the vulnerability management lifecycle.

COMPLIANCE WORKFLOWS

Take a best practice approach to compliance by managing vulnerabilities on a regular, cyclical basis. Retina CS makes this easy by providing a single console for running scans, reporting on the results, managing protection agents, and providing mitigation.

INTUITIVE USER EXPERIENCE

The Retina CS console features a sophisticated, but very easy-to-navigate design. All critical functions and data are just a click away.

ADVANCED ASSET COORELATION

Attacks can occur slowly or with rapid brute force. Retina CS allows all events to be filtered by date and time ranges, and to be consolidated with severity filters, by assets, and by attack vectors and vulnerabilities. You can prioritize problems and quickly mitigate – all via a single console.

PLATFORM INDEPENDENCE

Retina CS uses the latest technology to provide a completely flexible user experience. It allows support for multiple browsers and platforms, sandbox-based application security, and a rich internet application experience.

SYSTEM REQUIREMENTS

WINDOWS SERVER 2003 SP2 OR HIGHER (32-BIT AND 64-BIT)
 WINDOWS SERVER 2008 (32-BIT AND 64-BIT)
 WINDOWS SERVER 2008 R2 (64-BIT)
 MICROSOFT SQL SERVER 2005 SP1 OR HIGHER
 MICROSOFT SQL SERVER 2008
 INTEL PENTIUM 4 DUAL CORE 2.4GHZ
 1GB OF MEMORY (RAM)
 300MB REQUIRED FOR SOFTWARE INSTALL / 20GB (DATABASE).
 NETWORK INTERFACE CARD (NIC) WITH TCP/IP ENABLED
 MICROSOFT .NET FRAMEWORK 3.5 (INCLUDED WITH INSTALLER)
 MICROSOFT INTERNET INFOSERVICES (IIS) 6.0 OR HIGHER ASP.NET
 ADOBE FLASH PLAYER 9.0 OR HIGHER

About eEye Digital Security

Since 1998, eEye Digital Security has made vulnerability management simpler, less expensive, and more effective by providing the only unified vulnerability and compliance management solution that integrates assessment, mitigation, and protection into a complete offering. Consistently the first to uncover critical vulnerabilities and prevent their exploit, eEye leverages its world-renowned research and development to strategically secure customer assets. Thousands of mid-to-large size organizations, including some of the most complex IT environments in the world, rely on eEye solutions to protect against the latest known, unknown, and zero-day vulnerabilities.
