

Retina CS Add-On: Patch Management Module

INTEGRATED, AUTOMATED, AGENTLESS WINDOWS PATCH MANAGEMENT

Combined with eEye's Retina CS Management Console, the Patch Management Add-On Module closes the loop on vulnerabilities with **seamless patching from a single console.**

For today's organizations, often running hundreds of applications, it's incredibly difficult to prioritize and target patching based on asset and/or compliance risk. Difficulties with patch management present serious security risks and as a result, resource drain to stay on top of it. In addition, for those using a patch management application that isn't integrated into their vulnerability management lifecycle, there's no way to correlate patches to vulnerabilities.

CLOSE THE LOOP WITH INTEGRATED PATCH MANAGEMENT

eEye created the Add-on Patch Management module to close the loop on vulnerabilities and provide seamless patching from a single console. It improves the efficiency and effectiveness of the entire patch process by correlating patches with vulnerabilities and targeting patches based on risk profiles. Your IT Security team can focus on other priorities, while providing end-to-end reporting on the entire patch management cycle.

REDUCE THE BURDEN OF PATCH MANAGEMENT

In combination with the Retina CS Management Console, our Patch Management Add-on Module streamlines the entire process from discovery and assessment to patch deployment and verification.

PATCH BASED ON RISK PROFILES

Map discovered vulnerabilities to available patches and utilize the advanced targeting and categorization of assets to more appropriately prioritize patch activities. Deploy and manage patches on all machines across different Microsoft technologies.

AUTOMATED PATCHING PROCESS

Not only can you automatically download missing Microsoft security updates based on discovered vulnerabilities, but you can also automatically deploy the missing Microsoft patches or service-packs throughout your network at the end of scheduled scans.

BENEFITS

REDUCE EFFORT AND EXPENSE via integrated, automated patching processes

COMPLETE VISIBILITY into all asset risks through end-to-end reporting

INCREASED FLEXIBILITY TO DEPLOY AND MANAGE patches on all machines across different Microsoft technologies

IMPROVE THE EFFICIENCY AND EFFECTIVENESS OF PATCH PROCESSES with vulnerability correlation and targeting patches based on risk profiles

AUTOMATICALLY DOWNLOAD AND DEPLOY missing Microsoft security updates based on discovered vulnerabilities

eEye Digital Security®

OUT-OF-THE-BOX REPORTING

Out-of-the-box reporting gives you options such as patch availability reports, targets requiring patch, patch deployment results, and more.

VULNERABILITY AND PATCH CORRELATION

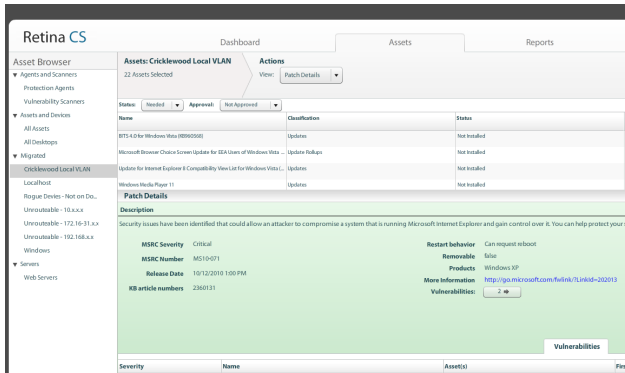

Vulnerability and patch correlation allows you to link vulnerabilities to available patches, displayed via an easy-to-use dropdown list.

AUTOMATED PATCHING PROCESS

Not only can you automatically download missing Microsoft security updates based on discovered vulnerabilities, but you can also automatically deploy the missing Microsoft patches or service-packs throughout your network at the end of scheduled scans.

FULL CIRCLE VULNERABILITY MANAGEMENT

Cost effective, integrated, agent-less patch management provides full-circle vulnerability management from a single platform to save time and money.

SYSTEM REQUIREMENTS

- RETINA CS 2.0.X + AND RETINA INSIGHT 2.0.1 +
- WINDOWS SERVER 2003 SP2 OR HIGHER (32-BIT), SERVER 2008 (32-BIT AND 64-BIT), OR SERVER 2008 R2 (64-BIT)
- MICROSOFT SQL SERVER 2005 SP3 OR 2008 SP2 (STANDARD OR ENTERPRISE EDITIONS ONLY)
- MICROSOFT SQL SERVER REPORTING SERVICES, ANALYSIS SERVICES, AND INTEGRATION SERVICES
- INTEL DUAL CORE 2.0GHZ (OR COMPATIBLE, MINIMUM)
- 4GB MINIMUM / 8GB RECOMMENDED (REQUIRES X64 OS)
- 700MB SOFTWARE INSTALL / 40GB DATABASE MINIMUM / 30GB (PATCH REPOSITORY MINIMUM)
- NETWORK INTERFACE CARD (NIC) WITH TCP/IP ENABLED
- MICROSOFT .NET FRAMEWORK 3.5 (INCLUDED WITH INSTALLER)
- MICROSOFT IIS 6.0 OR HIGHER ASP.NET

About eEye Digital Security

Since 1998, eEye Digital Security has made vulnerability management simpler, less expensive, and more effective by providing the only unified vulnerability and compliance management solution that integrates assessment, mitigation, and protection into a complete offering. Consistently the first to uncover critical vulnerabilities and prevent their exploit, eEye leverages its world-renowned research and development to strategically secure customer assets. Thousands of mid-to-large size organizations, including some of the most complex IT environments in the world, rely on eEye solutions to protect against the latest known, unknown, and zero-day vulnerabilities.
