

Retina CS Add-On: Regulatory Reporting Packs

AUTOMATED REGULATORY COMPLIANCE MANAGEMENT

Combined with eEye's Retina CS Management Console, Regulatory Reporting Packs provide **automated compliance management** for corporate policies, government regulations, and industry standards.

According to recent research, more than 85% of IT security pros are impacted by regulatory compliance*. Many organizations are resource-strained by the need to prove ongoing compliance to critical regulations such as PCI, HIPAA, and Sarbanes-Oxley. Aligning internal security processes with regulations and providing reports to management and auditors are notoriously time-consuming and costly exercises; compliance initiatives are reported to take up to 50% of a security team's work week*.

EASILY COMPLY WITH EEYE

In combination with the Retina CS Management Console, our Regulatory Reporting Packs greatly simplifies how you navigate through the increasingly complex regulatory landscape. The solution automates compliance management for corporate policies, government regulations, and industry standards, and offers a full list of reports that map vulnerability and configuration audits to specific mandates including PCI, HIPAA, SOX, GLBA, NIST, FERC/NERC, MASS 201, ISO, COBIT, and ITIL.

CENTRALIZED COMPLIANCE CONTROLS

As regulations continue to evolve and audits become even more comprehensive, you need a centralized way to manage compliance without losing sight of broader IT security protections. eEye solutions reduce the effort and investment of compliance by providing automated controls and monitoring processes for risk assessment, compliance reporting, and vulnerability assessment.

VALUABLE MAPPING

Each report contains valuable mappings of the control objectives and specific computer controls as outlined within each mandate to our scan data, eliminating the costly manual processes of extracting raw data into security and compliance reports. Each configuration and patch vulnerability and audit is mapped directly to the appropriate control objectives outlined by the regulation.

BENEFITS

REDUCE COMPLIANCE COSTS by automating the management of compliance controls and procedures

CENTRALLY MONITOR AND REPORT on the state of enterprise compliance

GAIN ACTIONABLE INTELLIGENCE via an integrated data warehouse that provides executive dashboards, trending and drilldown reports

DETAILED MAPPING of configuration, patch and zero-day vulnerabilities to the control objectives outlined in each regulatory mandate

KEEP UP-TO-DATE WITH REGULATORY CHANGES utilizing eEye reports which are updated on a frequent basis to include changes to regulatory controls and newly discovered vulnerabilities

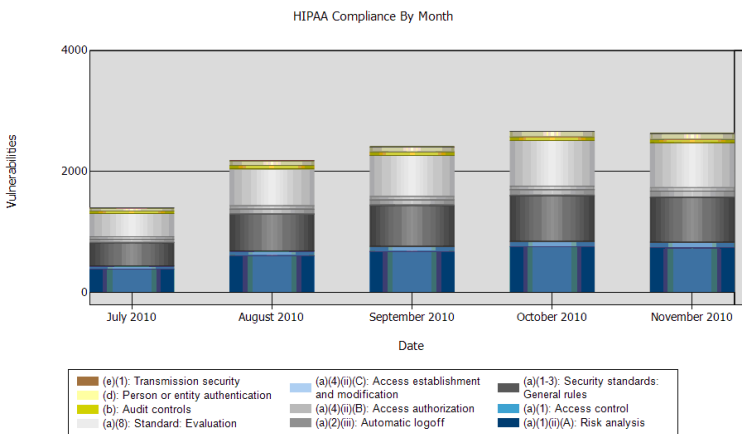

eEye Digital Security®

CENTRALIZED REPORTING

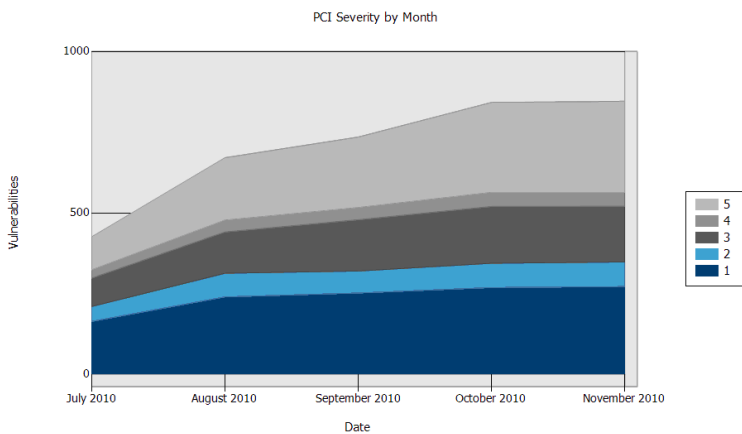

Centrally monitor, alert and report on compliance standing on an ongoing basis and provide a comprehensive view of the all managed systems on the network and build the foundation for an effective program to identify, assess and manage IT risks associated with control objectives designed to maximize compliance with the regulation.

CUSTOMIZED BY VERTICAL

- >> Base Pack: ITIL, ISO, COBIT (included with any other pack)
- >> Financial Pack: GLBA, SOX
- >> Government Pack: FISMA/NIST, FERC/NERC, MASS 201
- >> Retail Pack: PCI, SOX
- >> Healthcare Pack: HIPAA, SOX

HIPAA Compliance Report Example

PCI Severity Report Example

SYSTEM REQUIREMENTS

- RETINA CS 2.0.X + AND RETINA INSIGHT 2.0.1 +
- WINDOWS SERVER 2003 SP2 OR HIGHER (32-BIT), SERVER 2008 (32-BIT AND 64-BIT), OR SERVER 2008 R2 (64-BIT)
- MICROSOFT SQL SERVER 2005 SP3 OR 2008 SP2 (STANDARD OR ENTERPRISE EDITIONS ONLY)
- MICROSOFT SQL SERVER REPORTING SERVICES, ANALYSIS SERVICES, AND INTEGRATION SERVICES
- INTEL DUAL CORE 2.0GHZ (OR COMPATIBLE, MINIMUM)
- 4GB MINIMUM / 8GB RECOMMENDED (REQUIRES X64 OS)
- 500MB SOFTWARE INSTALL / 40GB DATABASE MINIMUM
- NETWORK INTERFACE CARD (NIC) WITH TCP/IP ENABLED
- MICROSOFT .NET FRAMEWORK 3.5 (INCLUDED WITH INSTALLER)
- MICROSOFT IIS 6.0 OR HIGHER ASP.NET
- ADOBE FLASH PLAYER 10.0 OR HIGHER
- ORACLE SUN JAVA VERSION 6 UPDATE 21 OR HIGHER
- MICROSOFT SILVERLIGHT 4.0 OR HIGHER

About eEye Digital Security

Since 1998, eEye Digital Security has made vulnerability management simpler, less expensive, and more effective by providing the only unified vulnerability and compliance management solution that integrates assessment, mitigation, and protection into a complete offering. Consistently the first to uncover critical vulnerabilities and prevent their exploit, eEye leverages its world-renowned research and development to strategically secure customer assets. Thousands of mid-to-large size organizations, including some of the most complex IT environments in the world, rely on eEye solutions to protect against the latest known, unknown, and zero-day vulnerabilities.
