

# Retina<sup>®</sup> Web Security Scanner

WEB SECURITY, VULNERABILITY ASSESSMENT AND POLICY COMPLIANCE

Retina's **industry-leading web security scanning technology** gives users the tool required to both identify and remediate vulnerabilities in their web applications.

Hackers are increasingly targeting web applications with Gartner estimating that 70% of attacks against websites are coming at the application layer. Enterprises have increasingly leveraged web applications as the interface of choice to access databases that contain mission critical business data as well as confidential customer information such as credit card and social security numbers.

Organizations need a web application scanner that is automated, comprehensive and accurate in order to assess their exposure to attacks at the web application layer.

## TOP RATED SECURITY FOR YOUR WEB APPLICATIONS

Retina Web Security Scanner is a best-in-class web scanning solution that rapidly and accurately scans large, complex web sites and web applications to tackle web-based vulnerabilities. Retina Web Security Scanner identifies application vulnerabilities as well as site exposure risk, ranks threat priority, produces highly graphical, intuitive HTML reports, and indicates site security posture by vulnerabilities and threat level. Retina Web Security Scanner enables users to secure their networks by:

- Comprehensively assessing web applications using contextual analysis
- Fully Automating the Assessment Process
- Consolidating Results to Increase Remediation Efficiency

"The Retina Web Scanner product has proven to be an extremely useful tool in our arsenal during the actual web development process. The reporting engine allows us to zero in on potential issues quickly; as a result, deliver a better end product to our customers."

Nelson Martinez Jr., Systems Support Manager  
City of Miami Beach

## FAST FACTS

ACCURATELY IDENTIFIES  
all application Links

SCANNING TECHNOLOGY SAFE  
for all Product Environments

FULLY AUTOMATED SCANNER  
with no user interaction required  
after scan initiation

RESULTS IN .XML OR DATABASE  
format

VULNERABILITIES CONSOLIDATED  
to facilitate remediation

REPORTS ALLOW VULNERABILITY  
recreation with Validate button

ENABLE REGULATORY  
compliance initiatives

eEye Digital Security<sup>®</sup>

## THREAT ANALYSIS

Retina Web Security Scanner doesn't just detail a list of vulnerabilities; it helps security teams understand the architecture of their sites. Where are they receiving data? Where are they sending data? What links could be vulnerable and need special attention?

## GROUP SPECIFIC REPORTS

Retina Web Security Scanner includes reports that contain only the vulnerabilities to be fixed by specific groups (server, developers and database). This simplifies remediation efforts by allowing security teams to easily assign vulnerabilities to the personnel responsible for fixing them.

## INTERACTIVE SITE MAPPING

Retina Web Security Scanner includes interactive site maps that allow security teams and developers to look at a graphic representation of their site and the location of any vulnerabilities.

## PRIVACY REPORTING

Retina Web Security Scanner includes privacy reports that enable enterprises to determine if web applications are complying with privacy and data security policies.

## REMEDATION ESTIMATES

Retina Web Security Scanner includes time and cost estimates for remediating all discovered vulnerabilities to expedite budgeting.

## WEB SERVICES SUPPORT

Retina Web Security Scanner has support for testing SOAP packets including the ability to identify and automatically parse WSDLs.

## SYSTEM REQUIREMENTS

WINDOWS 2000 PROFESSIONAL

WINDOWS 2000 SERVER

WINDOWS XP (32-BIT)

WINDOWS SERVER 2003 (32-BIT)

WINDOWS VISTA (32-BIT)

INTEL PENTIUM IV 1.4GHZ (OR COMPATIBLE)

1GB (COMMAND LINE MODE) / 2GB (GRAPHICAL UI MODE)

AT LEAST 500MB OF FREE DISK SPACE

RESOLUTION OF 1024X768 OR HIGHER

MICROSOFT .NET FRAMEWORK 2.0 OR 3.0

MICROSOFT INTERNET EXPLORER 6.0 OR HIGHER

INTERNET ACCESS REQUIRED

## About eEye Digital Security

Since 1998, eEye Digital Security has made vulnerability management simpler, less expensive, and more effective by providing the only unified vulnerability and compliance management solution that integrates assessment, mitigation, and protection into a complete offering. Consistently the first to uncover critical vulnerabilities and prevent their exploit, eEye leverages its world-renowned research and development to strategically secure customer assets. Thousands of mid-to-large size organizations, including some of the most complex IT environments in the world, rely on eEye solutions to protect against the latest known, unknown, and zero-day vulnerabilities.
