

# Integrated Security & Threat Management Appliances

## eEye Makes Integrated Security & Threat Management Simple

eEye offers a full line of integrated security and threat management appliances dedicated to endpoint protection, vulnerability assessment and risk management. The appliances, which come equipped with REM, Retina, and Blink provide multi-platform network discovery, automated vulnerability and risk assessment, centralized policy enforcement, and powerful compliance and regulatory audit capabilities.

eEye integrated security & threat management appliances are also capable of managing Blink Professional endpoint protection clients - all from within the REM Management Console. eEye appliances help customers by centralizing security management processes, dramatically reducing exposure, preventing attacks and improving overall security preparedness.

## Business Benefits

eEye integrated security and threat management appliances are designed to simplify vulnerability assessment and security management efforts and help maximize organizations' limited resources.

### Rapid Deployment

A wizard-driven install and best-practice default settings automate the setup process. In less than 15 minutes, the appliance can be deployed and scanning.

### All-In-One Security Management

Everything the customer needs for centralized vulnerability and endpoint management comes pre-installed, pre-configured, pre-tuned, and pre-licensed in the appliance.

### Built for Scalability

Growing organizations can rapidly add new boxes to the existing deployment while larger organizations can manage distributed eEye appliances or software versions at regional branches.

### Lower Total Cost of Ownership

Combining disparate security practices into a cohesive policy, threat and vulnerability management framework leads to dramatic TCO savings.

### Vulnerability Assessment

eEye appliances pinpoint network vulnerabilities, operating system vulnerabilities, application vulnerabilities, improper configurations, and published zero-day threats.

### Discovery and Patch Assessment

eEye appliances can rapidly discover and assess all network devices, operating systems, applications, patch levels, and policy configurations.

### Centralized Policy Management

Organizations can couple Blink and Retina to gain total policy enforcement, auditing, vulnerability assessment and protection for Microsoft Windows based hosts.

### Powerful Reporting and Analysis

Retina and Blink are linked by a common management interface, REM, which generates detailed, customizable reports and graphs that expedite analysis and decision making.

The endpoint to vulnerability starts here.

## FUNCTIONALITY

	Retina 651	Retina 1505	Blink 200	eEye Software
Network Based Vulnerability Assessment	Yes	Yes	No	Yes
Network Based Traffic Analyzer	Yes	No	No	Yes
Network Distributed Scanners	No	Yes	No	Yes
Hardened Operating System	Yes	Yes	Yes	No
Manage Blink Agents	No	Yes	Yes	Yes
Includes Operating System	Yes	Yes	Yes	No
Includes SQL Database	No	Yes	Yes	No
Asset Based Management	No	Yes	Yes	Yes
Scheduled Vulnerability Assessment Scans	Yes	Yes	Yes	Yes
Customizable Audits	Yes	Yes	Yes	Yes
Installs as a Distributed Appliance	Yes	Yes	Yes	No
Includes eEye Platinum Support	Yes	Yes	Yes	No

## SYSTEM

	Retina 651	Retina 1505	Blink 200	eEye Software
10/100/1000 Mbps Network Ports	2	2	2	10/100 Mbps Minimum
Microprocessor	Dual Core CPU	Quad CPU	Dual Core CPU	P4 1.4GHz Minimum
RAM	2GB	4GB	2GB	1GB Minimum
Storage	250 GB	4x250GB (RAID 1+0-500GB)	250 GB	300MB Minimum
Operating System	Windows XP Embedded	Windows 2003 Embedded	Windows 2003 Embedded	Windows Win2k3/Win2k8
Fault Tolerance	No	Yes	No	Yes
Database	Not Included	MS SQL 2005 Workgroup	MS SQL 2005 Workgroup	MS SQL 2005/2008
Size	1 U Rack Mount	2 U Rack Mount	1 U Rack Mount	N/A
Warranty	3 Years	3 Years	3 Years	N/A

## PERFORMANCE

Maximum Assets for Scanning	5000	15000	N/A	Unlimited
Maximum Management of Blink Agents	N/A	5000	200	Unlimited
Concurrent Administrative Sessions	1	64	10	Unlimited
